EXAMINER'S AMENDMENT & REASONS FOR ALLOWANCE

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with John P. White on 4/9/04.

An examiner's amendment to the record appears below.

In the specification:

P.

Application/Control Number: 08/470,735

Page 3

Art Unit: 1647

Changed the title to:

--ANTIBODIES TO PROSTATE-SPECIFIC MEMBRANE ANTIGEN--.

After the claims, inserted this abstract:

P₁ --This invention provides purified antibodies to the outer membrane domain of prostate-specific membrane (PSM) antigen, compositions of matter comprising PSM antigen antibodies conjugated to a radioisotope or a toxin, and a method of imaging prostate cancer by using PSM antigen antibodies.--.

In the claims:

Canceled claim 139.

P₂ 12
140. (Currently Amended) The purified antibody of any one of claims 128-
[139]138, wherein the antibody is a monoclonal antibody.

13
141. (Currently amended) A composition of matter comprising the antibody of
any one of claims 128-138 and an agent conjugated to the antibody.

Art Unit: 1647

2. The following is an examiner's statement of reasons for allowance: the request by Applicants to put the instant Application into interference with U.S. Patent No. 6,107,090 (U.S. Application Serial No. 08/838,682) has been rendered moot with the cancellation of claim 139. According to the prosecution history of 08/838,682, the claim limitation that an antibody or antigen binding portion of said antibody is selected for its ability to bind to live cells (see claim 1 of U.S. Patent No. 6,107,090) distinguishes that invention as being patentably the same invention as the instant invention. The claims of U.S. Patent No. 6,107,090 are therefore a sub-genus of the instant claims, and there is no art or reason of record that renders the patented sub-genus claims obvious over the instant generic claims, thereby failing the "two-way" test required in order to propose the establishment of an interference.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Technical Center 1600 general number which is (571) 272-1600.
